Front End Developer · Graphic Designer — Mexico City

📍 Mexico City, Mexico · Remote · Hybrid

PROFILE

I'm a hybrid profile: **graphic designer by training and front end developer by trade**. That means I don't just translate other people's designs — I think through the interface, from information architecture to the component in production.

I specialize in **complex processes**: tax filings, banking payment flows, government procedures. Where others see forms, I see the chance for someone to finish a process without getting frustrated.

I've also spent almost a decade **teaching web design at university**, which keeps me sharp and forces me to explain complex things simply — a skill that also pays off on any team.

Mode	Remote · Hybrid	Available to travel	Yes
Specialty	UX/UI · Fintech · Gov	Main stack	React · Vite · Figma
Languages	Spanish · English	Experience	12 yrs dev · 9+ teaching

EXPERIENCE — DEVELOPMENT

Front End Developer · SYE Software → SAT

Oct 2024 — present

- Development of institutional platforms and admin panels for Mexico's tax authority.
- UX/UI design in Figma: design guidelines, institutional style mapping and prototypes for tax filings.
- Information architecture with content maps and flow diagrams for complex procedures, including informational apps for Customs.

Stack: React · MUI · Bootstrap 5 · Vite · Figma

Front End Developer · Nuvei

Mar 2020 — Aug 2020

- Graphic interfaces for banking applications and online payment flows.
- User experience optimization for financial processes.

Stack: React · SASS · Node · MasterCard · Visa · PIX

Front End Developer · Abraxas

Sep 2018 — Apr 2020

- Components for responsive web platforms and service optimization with GraphQL.
- Unit testing (Jasmine, Enzyme) and SEO-optimized landing pages.

Stack: GraphQL · Jasmine · Enzyme · SEO

Front End Developer · NearBPO

Jun 2015 — Sep 2018

- Responsive components for e-invoicing and web applications.
- Prototypes and apps in Ionic for iOS and Android with consistent multi-device interfaces.

Stack: Ionic · iOS · Android

Front End Developer · CID Group

Sep 2013 — Jun 2015

- Wireframes, navigation flows and web design proposals.
- Functional prototypes with AngularJS, SASS, Gulp, web services and WordPress.

Stack: AngularJS · Gulp · WordPress

Front End Developer · McCann Erickson

Jul 2011 — Sep 2013

- Mobile sites and applications for launches and campaigns for brands like Coca-Cola and Buick.
- Maintenance of dynamic sites and optimization of sales applications.

EXPERIENCE — TEACHING

- I teach HTML, CSS, JS, UX in Figma, responsive design with Bootstrap and usability.
- I teach the real-world workflow of web projects with tools like Asana.
- I guide students from planning through implementing complete, working sites.
